SUNIL GAUTAM

SENIOR FULL STACK ENGINEER (Node/React) • SYSTEM DESIGN • REST / GraphQL • AI-Forward

Lucknow, India | +91-8081433959 | business.sunilgautam@gmail.com | linkedin.com/in/sunil-gautam-061312168 | github.com/007sunilgautam

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 13+ years building high-performance, scalable systems on **Node.js and React** — owning problems end to end, from implementation through deployment. Strong **system-design instincts**: data modelling, service boundaries, component architecture, and event-driven thinking. Designs and versions **REST and GraphQL APIs** as clean contracts, models data across **relational (SQL) and NoSQL (MongoDB)** stores, and writes well-tested code with the observability to debug live, distributed systems. Delivered in **correctness-critical domains** (banking, e-commerce). An **AI-forward** engineer who uses AI-assisted tools (Claude Code) to accelerate delivery while staying the judge of correctness. Clear communicator; thrives independently in remote, fast-paced teams.

TECHNICAL SKILLS

Core: Node.js, Express.js, React.js, Next.js, TypeScript, JavaScript (ES6+), Full-Stack End-to-End Ownership

APIs: REST API design & versioning, GraphQL, API Contracts, Microservices, Pub/Sub & Event-Driven Architecture

System Design: Data Modelling, Service Boundaries, Component Architecture, Scalability (millions of users), Distributed Systems, Performance

Data: Relational / SQL (PostgreSQL, MySQL), NoSQL (MongoDB), Schema Design, Query Optimization, Right-Store-for-Use-Case

Cloud & DevOps: AWS (EC2, S3, RDS, CloudWatch), Git workflows, CI/CD, Observability & Monitoring, Debugging in Production (GCP/Azure: familiar)

AI-Forward: AI-assisted development — Claude Code, Cursor, Copilot — to accelerate delivery while judging correctness

Domains: Banking / Fintech (correctness-critical), E-commerce / Payments, Real-Time SaaS; English (advanced), Remote-first

PROFESSIONAL EXPERIENCE

Team Lead / Senior Full Stack Engineer — HKK Entertainment Private Limited
Jan 2024 – Present

Node.js, Express.js, React.js, Next.js, TypeScript, MongoDB, GraphQL, REST, Socket.IO, AWS, CI/CD

- Build and ship production features **end to end** across **Node.js backends and React frontends** for **Zillit**, owning work from implementation through deployment.
- Design and version **REST/GraphQL APIs** as the frontend–backend contract; make architecture calls on data modelling, service boundaries, and component design with event-driven thinking.
- Model data across **MongoDB and relational** stores; set up observability (CloudWatch) to catch and debug issues in live systems; built a reusable component library (~20–25% less effort).
- Use **AI-assisted development (Claude Code)** to accelerate delivery while owning correctness; mentor 6+ engineers.

Consultant Project Leader (Banking / Fintech) — R Systems International
May 2021 – Dec 2023

Node.js, Express.js, React.js, TypeScript, PostgreSQL, MySQL, AWS, Bitbucket, CI/CD

- Built **IATF (CIBC)**, a **correctness-critical banking** platform — secure Node.js REST APIs, relational data modelling (PostgreSQL), audit logging, and authorization.
- Owned Git workflows, CI/CD, and production monitoring; deep-dived and debugged complex production issues to root cause in a distributed setup.

Technical Solution Architect (E-commerce) — Shivkaal Infotech Pvt. Ltd.
Sep 2020 – Apr 2021

Node.js, Express.js, TypeScript, PostgreSQL, MySQL, REST / GraphQL

- Architected **Krishak Fresh**, an **e-commerce/payments** platform, end to end; designed REST/GraphQL API contracts and chose the right data stores/structures per use case.

Senior Software Engineer — STPL
Sep 2018 – Sep 2020

Node.js, Express.js, Angular, MySQL, REST APIs

- Built high-performance Node.js REST backends and responsive frontends; optimised API performance and reliability under load.

Software Engineer — Singsys Pte Ltd
Jan 2012 – Aug 2018

Node.js, JavaScript, Angular, MySQL, REST APIs

- Built **Tueetor**, a marketplace platform — backend REST APIs and frontend interfaces; collaborated in Agile teams.

SELECTED PROJECTS

IATF (CIBC). Correctness-critical banking platform with secure Node.js REST APIs, PostgreSQL modelling, and production observability.

Zillit. Node.js/React SaaS with versioned REST/GraphQL APIs, event-driven real-time, and MongoDB, on AWS.

Krishak Fresh. E-commerce/payments platform architected end to end with REST/GraphQL contracts and mixed data stores.

EDUCATION

MCA — Master of Computer Applications, Uttar Pradesh Technical University (UPTU), 2012

BCA — Computer Applications, Bhopal University, 2009

ADDITIONAL

Experience: 13+ years • **Location:** Lucknow, India — Fully Remote • **English:** Advanced • **Notice:** < 15 days
