PROFESSIONAL SUMMARY

Senior Frontend Engineer with 13+ years building production **web and cross-platform mobile** apps and leading hands-on. Delivered **hybrid web/mobile (iOS + Android)** products for **facility management, maintenance, and field operations** — with **offline-first** sync for workers on slow or lost connectivity, exactly the problem space Snapfix serves. Strong in **reusable component architecture, state management, responsive/adaptive layouts, accessibility, performance, and testing**, plus API integration and async data. Leads projects, mentors engineers, and collaborates closely with Product and Design; a **fluent AI-assisted developer** (Claude) who owns the correctness, security, and usability of what ships. Turns ambiguity into clear, incremental delivery across time zones.
