SUNIL GAUTAM

FRONTEND SOFTWARE ENGINEER (React) • FRONTEND ARCHITECTURE • COMPONENT SYSTEMS

Lucknow, India | +91-8081433959 | business.sunilgautam@gmail.com | linkedin.com/in/sunil-gautam-061312168

PROFESSIONAL SUMMARY

Frontend Software Engineer with 13+ years building and architecting robust, scalable React web platforms. Deep command of React — hooks, context, and component lifecycle — and hands-on ownership of reusable, consistent component libraries that improve efficiency and maintainability across large web interfaces. Strong in web performance optimisation, responsive design, and cross-browser / cross-platform compatibility, with state management (Redux, Context) and Jest testing. Experience with caching and offline/async data strategies for high-data-load, field-facing applications — including industrial work-order and facility-management platforms directly adjacent to maintenance and operations software. Collaborates closely with backend engineers, UI/UX designers, and product managers to keep the frontend aligned with product strategy and current with emerging technologies.

TECHNICAL SKILLS

React: React.js, Next.js, Hooks, Context API, Component Lifecycle, Custom Hooks, Reusable Component Libraries, Component-Driven Architecture

State Management: Redux, Context API, Async / Server State, Caching Strategies for High Data Load

Language & Markup: TypeScript, JavaScript (ES6+), HTML5, CSS3

Performance & UX: Web Performance Optimization, Responsive Design, Cross-Browser / Cross-Platform Compatibility, Code Splitting, Lazy Loading, Memoization, Fast Load Times

Styling: Tailwind CSS, Bootstrap, CSS Grid/Flexbox

Testing: Jest, React Testing Library, Cypress, Postman

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, Socket.IO / Real-Time, Microservices

Cloud & Data: AWS (EC2, S3, RDS, CloudWatch), Firebase, MongoDB, PostgreSQL, MySQL, Git / GitHub / GitLab / Bitbucket, CI/CD

Practices: Frontend Architecture Reviews, Agile/Scrum, Cross-Functional Collaboration, Mentoring, AI-Assisted Development

PROFESSIONAL EXPERIENCE

Team Lead / Senior Frontend Engineer — HKK Entertainment Private Limited

Jan 2024 – Present

React.js, Next.js, TypeScript, Redux, Hooks, Jest, Node.js, MongoDB, Socket.IO, Firebase, AWS, CI/CD

- **Architected a robust, scalable React/Next.js frontend platform** for **Zillit**, an enterprise SaaS product, with clean integration into backend systems and services.
- **Led design and implementation of a consistent, reusable component library**, improving efficiency and maintainability and cutting feature-development effort ~20–25%.
- Optimized for **performance across devices and browsers** — fast load times via code splitting, lazy loading, memoization, and render tuning; ensured responsive, cross-platform UI.
- Applied React deeply — **hooks, context, custom hooks, and lifecycle** — with Redux state management and Jest tests.
- Built real-time features with Socket.IO/Firebase and handled **async/high-data-load state** with caching for responsive UX.
- Collaborated with **backend engineers, UI/UX designers, and product managers**; regularly reviewed and updated frontend architecture against emerging trends. Mentor 6+ engineers.

Senior Software Engineer (Facility / Maintenance) — STPL

Sep 2018 – Sep 2020

Angular, Ionic, Cordova, Node.js, Express.js, MySQL, Caching, Offline Sync

- Built **fmPilot** and **fsElite Connect**, enterprise **facility-management / maintenance work-order** platforms for multi-location, end-to-end operations — the same industrial-operations domain as predictive-maintenance software.
- Implemented **offline-first synchronization, caching strategies, and background sync** for field workers under high-data-load, low-network conditions — directly matching caching/async patterns for data-heavy apps.
- Optimized API communication, mobile performance, and cross-platform (Android/iOS) compatibility.

Consultant Project Leader — R Systems International

May 2021 – Dec 2023

React.js, TypeScript, Node.js, Express.js, PostgreSQL, MySQL, AWS, Bitbucket, CI/CD

- Built secure, performant React front-end and transaction flows for **IATF (Instant Access to Deposited Funds) for CIBC**, an enterprise banking platform with a risk-based decision engine.
- Managed CI/CD deployments and production monitoring; reduced defects through code reviews and quality gates. Led delivery of **WorkfloPlus**, a mobile-first workflow SaaS.

Technical Solution Architect — Shivkaal Infotech Pvt. Ltd.

Sep 2020 – May 2021

Node.js, Express.js, TypeScript, PostgreSQL, MySQL, REST/GraphQL

- Architected **Krishak Fresh**, a grocery-delivery e-commerce platform, end to end — catalog, cart, checkout, and order-management UIs with responsive design.
- Designed normalized data models and REST/GraphQL APIs, improving query performance and scalability.

Software Engineer — Singsys Pte Ltd **Jan 2012 – Aug 2018**

Angular, Ionic, Node.js, MySQL, JavaScript

- Built **Tueetor**, a tutor-student marketplace with search, profiles, and booking workflows — responsive frontend plus backend REST APIs.
- Collaborated with designers and backend engineers in Agile teams to ship responsive, cross-browser interfaces.

SELECTED PROJECTS

Zillit — Enterprise SaaS Platform. Scalable React/Next.js frontend with a reusable component library, Redux state, and real-time features. Tech: React.js, Next.js, Redux, TypeScript, Jest, Node.js, MongoDB, AWS.

fmPilot / fsElite Connect — Facility & Maintenance Ops. Industrial work-order management with offline-first sync and caching for field teams.

IATF — Instant Access to Deposited Funds (CIBC). Enterprise banking platform with secure transaction flows and risk-based decisioning.

Krishak Fresh. E-commerce grocery-delivery platform, architected and delivered end to end.

EDUCATION

MCA — Computers, Uttar Pradesh Technical University (UPTU), 2012

BCA — Computer Applications, Bhopal University, 2009

ADDITIONAL

Experience: 13+ years • **Location:** Lucknow, India — open to Remote • **Notice:** < 15 days • **Languages:** English, Hindi
